Module 2.1 Learning Objectives

Upon completing this module, the learner will be able to:

❖ Comprehend what digital inclusion is and the importance of ensuring citizens across Europe have the digital skills and hardware to participate online effectively, especially in the face of COVID 19 restrictions.

❖ Understand why digital inclusion must be promoted and identify the different methods of how data poverty and digital inclusion is being addressed.

❖ Recognise that places such as libraries are an effective path to build digitally inclusive communities where learners can have access to the internet and digital devices

❖ Comprehend that those with lower digital skills lack a great degree of confidence and recognise the common fears of crime, lack of trust or not knowing where to start online can be overwhelming

❖ Recognise that adult learners are driven by purpose and understand that utilising digital skills to provide more relevant training for adults will help to motivate and engage their attention more effectively in class as it pertains directly to their professional and personal
